Tell Me a Story Practice.....

We have been working on Walk-a-Thon Problems where we tell you the story and you have had to make a table, graph, equation, etc.

Now it is your turn.........

1. If this is my table, tell me a walk-a-thon story:

Miles	Money
1	3
2	6
3	9
4	12
5	15

2. If this is my table, tell me a walk-a-thon story:

Miles	Money
1	3
2	5
3	7
4	9
5	11

3. If this is my equation, tell me a walk-a-thon story:

$D = 2M + 5$ D = dollars (money) M = miles walked

4. If this is my equation, tell me a walk-a-thon story:

$D = 3M - 2$ D = dollars (money) M = miles walked

5. If this is my graph, tell me a walk-a-thon story:

Dollars (y-axis, labeled 0 to 10)
Miles (x-axis, labeled 0 to 6)

6. If this is my graph, tell me a walk-a-thon story:

Dollars (y-axis, labeled 0 to 10)
Miles (x-axis, labeled 0 to 6)
